DEPARTMENTAL CORRESPONDENCE

TO: Ray Fischer, Erv Karaba, Dave Fuller

FROM: ✓ Susan Sandro

DATE: February 2, 1990

SUBJECT: WASTE SHIPMENTS

We have received an official request from the USEPA for any information pertaining to waste shipments sent to the Powell Road landfill from DAP facilities during the time it was operating, 1960-1984.

First, please check your files carefully and send me any correspondence, purchase orders, invoices, etc. that specifically mention the Powell Road landfill. In addition, please list any known waste hauling disposal companies (other than those on the attached listing) used by your facility during the same time period.

The law requires us to use all available means of obtaining this information, including asking for the information from key employees who worked at the facility or would have knowledge of waste disposal during those years. To document that we have done this, please list the names of who you talked to and what their position was during the time period.

We are facing a short deadline, so I would greatly appreciate a response by February 8, 1990. A handwritten response is fine.

SS/bk

C. Sandro

FROM: D. F. Fuller

Susan, you'll need to obtain this information directly from the plants. We do not keep any of the supporting documentation (bill of lading) in the purchasing department/record retentions.

Another alternative may be to retrieve from record retention all the payments made to Lou Fil company for analysis. You would have to coordinate that with Steve Kaufman in Accounts Payable.

Feel free to call if you have any questions.
